PROFESSIONAL SUMMARY

Motivated and enthusiastic fresher with a strong willingness to learn, adapt, and grow professionally. Possesses good analytical, problem-solving, and communication skills, with the ability to work effectively both independently and as part of a team. Eager to apply academic knowledge, develop new skills, and contribute to organizational success while building a strong professional career.

TECHNICAL SKILLS

Programming: Python, SQL (MySQL).

Data Analysis: Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Data Extraction, Data Transformation, Data Validation, Business Reporting, Business Insights.

Business Intelligence & Visualization: Power BI, DAX, Power Query, Dashboard Development, KPI Reporting, Interactive Reports, Data Visualization.

SQL & Database: Joins, Window Functions, CTEs, Subqueries, Aggregations, Query Optimization, Data Modelling.

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch

Data Science & Machine Learning: Machine Learning, Supervised Learning, Unsupervised Learning, Natural Language Processing (NLP), Feature Engineering, Model Evaluation, Classification, Regression, Clustering, Generative AI, Large Language Models (LLMs).

Machine Learning Algorithms: Random Forest, Linear Regression, Logistic Regression, Decision Trees, K-Nearest Neighbors (KNN), Naïve Bayes, K-Means Clustering, XGBoost.

Core Concepts: Object-Oriented Programming (OOP), DBMS, SDLC, Operating Systems, Data Quality, Data Documentation, Problem Solving.

AI & Tools: VS Code, Jupyter Notebook, MySQL, ChatGPT, Google Gemini, Claude, Antigravity,Databricks.

Data Science Internship — VCodez, Chennai (May 2025 – August 2025)

- Completed a structured Data Science training program covering the end-to-end data analytics workflow.
- Gained hands-on experience in data cleaning, preprocessing, and analysis using Python, Pandas, and NumPy on structured datasets.
- Performed Exploratory Data Analysis (EDA) and basic statistical analysis to identify patterns and derive insights.
- Built and evaluated machine learning learning projects using Scikit-learn, gaining exposure to supervised learning concepts and model evaluation techniques.
- Created data visualizations using Matplotlib and Seaborn to effectively present analytical findings.
- Strengthened foundational knowledge of Python, SQL, data analysis, and machine learning through practical exercises and guided projects.

PROJECTS

Wheat Bread Nutritional & Pricing Analysis | Power BI Dashboard | 2026

- Designed a multi-page interactive Power BI dashboard comparing nutritional KPIs (protein, fiber, sodium, calories, Wheat-to-Maida ratio) and pricing across 10+ bread brands.
- Built 5+ chart types — clustered column, bar, area, combo, and dynamic slicers — enabling multi-dimensional comparative product analysis.
- Performed data modelling and transformation to clean and structure raw nutritional data for analysis-ready reporting, identifying the healthiest and most cost-effective brand.

Stock Price Prediction and Analysis System (Learning Project)

- Built a stock price analysis and prediction application using Python, Pandas, NumPy, Scikit-learn, Matplotlib, and Streamlit.
- Performed data collection, preprocessing, feature preparation, and exploratory analysis on historical stock market datasets.
- Developed an interactive dashboard to visualize historical trends, predicted prices, model evaluation metrics (MSE, RMSE), and prediction summaries.
- Implemented CSV export functionality for historical and predicted datasets to support further analysis.
- Gained practical exposure to machine learning concepts, data visualization, and end-to-end analytical workflow through project-based learning.

SmartLoan — AI Powered Loan Eligibility Prediction System (Learning Project)

- Developed a multi-category loan eligibility prediction system using Random Forest Classifier trained on 200,000+ real loan records from the LendingClub dataset, achieving 91.49% accuracy and ROC-AUC of 0.9730.
- Built a Loan Optimizer that tests 288+ combinations of loan amount, interest rate and category to recommend the best loan profile for any applicant.
- Integrated real Indian bank comparison with actual 2025–26 interest rates across 10 banks (SBI, HDFC, ICICI, Axis, Kotak and others) for 8 loan categories.
- Implemented risk scoring engine that generates a 0–100 risk score with factor breakdown, what-if simulator and personalized improvement suggestion.

EDUCATION

B.Sc. Computer Science

- Bharath Institute of Higher Education and Research, Chennai
- 2023 - 2026 | CGPA: 9.2/10

Higher Secondary (Class XII)

- Chinmaya Vidyalaya, Thiruvananthapuram | CBSE
- 2023 | 92.2%

Secondary School (Class X)

- Sree Narayana Vidyapeetam Public School, Ernakulam | CBSE
- 2021 | 95.2%

CERTIFICATION

- HackerRank - Introduction to Programming Using Python (2026)
- AWS Training & Certifications - Introduction to Machine Learning (2025)
- Internship Completion Certificate – Data Science Internship (2025)
- Besant Technologies - Data Science Course (2026)
